

Concepts I am Not comfortable with:

- Solving for word problems
- Using percent
- Fractions
- Dividing fractions Polynomials and Radicals
- Geometry
- Seeing the word complex number(it throws my thinking off)
- Simplifying the powers of i .
- Finding the square root of quadratic equation
- Other problems
 - Having to make time pick up my little brother after school and rushing to make it to class (commute is hard- running out of gas, getting gas money, having to borrow transportation, etc.).
 - Getting the math course code very late
 - Not knowing how to do the code- thought it was simple, but it turned out to be very complicated.
 - Not being able to work on the homework at home (time restraint).
 - No computer or Wi-Fi at home, was able to sign up for laptop and hotspot, but only got hotspot (2weeks later).
 - Feeling like not catching up with the rest of classmates.
 - Feeling terrible about not remembering how to do a lot of the rules
 - Feeling rush to do all work due to being late to class and / or time restraint during the time at school.

Concepts I am comfortable with:

- Plotting points
- Using 2 points to get the y intercept
- Graphing
- Slope, y-intercept
- Finding the love of numbers again
